Summary

My first steps into technology were in 2010, when I got my first computer, and I haven't stopped since. I started my experience in technology studying programming, focusing on HTML, CSS and Javascript. Understanding a little more about digital products, I found UX & UI Design and fell in love with product development focusing on the user experience. I'm enchanted by Figma and I'm always exploring its features, creating wireframes, prototypes, usability tests and style guides. Studying and always willing to learn more. I think it's incredible to create and improve products and services thinking about how they will impact the user's life.

Skills

• **Web development:** HTML | CSS | JavaScript |
• **Framework/Library:** Bootstrap | ReactJs |
• **Design:** Figma | Canva |
• **Data analysis:** SQL | AWS |

Projects

• **Auto-Cars**
• **Website**
• **AppSofia**

See my projects on my **GitHub**.

Certifications

• **Ginead: Intermediate English**
• **EBAC: Introduction to Programming**
• **EBAC: SQL for data analysis**
• **SENAI**: Professional Initiation in Programming Logic
• **How Bootcamps**: UX Design for Everyone
• **OneBitCode**: Start in Programming
• **DIO**: Understanding Algorithms and Flowcharts
